

Commercial Projects

1- Botanical Gardens in Kurdistan – Iraq

The landscape architecture is inspired by the overarching concept of an urban oasis in a region whose chief natural feature is its green aspect. The landscape architecture evokes the garden's riverine landscape and at the same time shapes it.

➤ Main Features:

- The Urban Park including a restaurant, gift shop, small building for prayer, drinking fountains, ATM machines, money operated machines, restrooms and service operated garbage, and a vertical circulation leading from first basement to the garden (ground level).
- The laboratories in the Vertical Garden area where we can have school programs for all levels, including classes, training sessions, tours, films, audio or power point presentations, demonstrations, interpretive signs, and study of the plants inside or in the greenhouse.
- A section for weddings, graduation parties, social events...

➤ Perspectives:

2 – Aqua Tarin GEG Reklam Erbil, kurdistan, Iraq

The project consists 4 motels, business tower, female Fitness center, mall and hotel 5 stars. The land area about 500m²
